

# Slovak Army Training Center Lest Jakub High Rise Building

Unnecessary standard residential building has been modified for special forces training. Inside the house there is the possibility of a shooting in all directions using automatic weapons with real ammunition caliber 9 mm Luger, 5.56 x45 with a soft core bullets and shotgun cal. 12/70. Some rooms are resistant against bullets from sniper rifle 7.62 x51 NATO and are equipped with moving targets.

Safety is ensured by covering the walls of hard steel and anti-ricochet panels made of recycled rubber

The rooms can be allowed to enter the rappelling from the roof, in other cases windows are covered by a bulletproof window shutter

The walls of the rooms are protected by ballistic only where necessary. At some places the ballistic protection of sliding along the wall

The rooms can be equipped with portable bullet traps

Hallway are fitted with the same ballistic protection as the rooms

Some rooms are equipped repeated breachable doors, which are designed to train the technique of forced entry. Allow forced entry in several ways.

Electrical and communication equipment are also protected against bullets

The roof of building is reinforced by the airdrop of the special forces and is adjusted for their rappelling on the facade and forced to rooms.

At the training center was in May 2010 International Sniper Workshop NATO armies. One challenge was shooting from the roof and the windows of the building to the windows of another building on the remote controlled moving targets.

Sniper position on the roof and windows

Three teams of army sniper

Position of remote control targets

Computer (PDA) operating for remote control of the target device and hits control

Trolley for two type of Target Lifting Device (TLDr and CTLD)

Development and realization program of special methods, devices and equipments for training, rehabilitation prevention, recreation sport and free time
